Letter Of Recommendation

I am pleased to write this letter of recommendation for **Mr. Anurag Tripathi**. I have known Anurag for the last one year. Initially, he joined Com Olho as a Research Intern where he did his project in the Image processing domain. His passion for solving client related problems and writing code while working in our technology department made us offer him a full time job as **Product Manager** and he continued to serve with increasing skill in that capacity.

Anurag worked for my science and technology company that analyzes enterprise's data using its proprietary technology to drive better experiences for consumers. Anurag has developed software platforms, website design and development using his technical skills like Python with Django, machine learning and deep learning. He often played a significant role in the development and implementation of overall web strategies, dealing with the details as well as the big picture. His coding was excellent and his designs were unique and innovative, making clients always happy.

Anurag not only met deadlines but also explained his programs in a way that non-experts can easily understand. This skill came in handy when he presented his programs to clients who weren't particularly tech-savvy. Owing to his avid interest in artificial intelligence, he used his knowledge of machine learning and deep learning to come up with a project to unlock Com Olho's tech platform with real time facial recognition giving extra edge of authentication security to our clients.

Anurag is highly interested in artificial intelligence and keeps on pondering about the ways of including machine learning, deep learning etc in his projects to reach an optimum solution. Anurag takes his work very seriously and regularly enrolls in online courses to keep up with the latest developments in Artificial Intelligence and programming. His quick thinking and cautious personality helped the company avoid some costly and embarrassing mistakes. He has great potential and respects his superiors and enthusiastically solves all tasks.

He is a good team player and well-liked by all our co-workers and clients. He pitches innovative ideas at company meetings but also listens to what others have to say, including constructive criticism. When budgetary constraints limited the work our company could complete, Anurag put his highly creative mind to use to come up with alternatives. Almost without exception, he put the customer first, feeling as I do that the key to good business is satisfied customers.

In closing, let me say I have no hesitation in recommending Anurag for any position pertaining to product/software development. I feel confident he would be an asset to your organization.

Sincerely,

Lloyd Mathias
